Wine.....Page 53
Essential oils.....Page 55

Tables in this report are compiled from official U.S. export data from the Bureau of the Census, U.S. Department of Commerce. Values are f.a.s. (free along side). Except for juices and wine, quantity data are in metric tons. Factors for converting into traditional measures are:

1 metric ton = 2,204.62 pounds
1 metric ton = 1.1023 short tons
1 metric ton = 22.0462 hundredweight (cwt)
1 metric ton = 48.99 cases of 24 2 1/2 cans (45 lbs., net)
1 metric ton = 91.858 cases of 24 no. 303 cans (24 lbs., net)

Exports to Canada are understated because export declarations often are not filed when trucks cross the border. The amount of undercounting varies widely from product to product. Generally, the undercounting is greater for perishable products. According to USDA estimates, the percentage of actual, total U.S. horticultural product exports to Canada, which were counted in the official U.S. data, were 64 percent in 1984, 55 percent in 1985, 49 percent in 1986, and 50 percent in 1987. An estimate has not yet been made for 1988.

Approved by the World Agricultural Outlook Board – USDA
